

Missouri Job Development Fund

Fiscal Year 2011 Annual Report

Fellow Missourians,

It gives me great pride to present the 2011 Annual Report for the Missouri Job Development Fund. This report documents the accomplishments of the Missouri Customized Training Program which is critical to our top priority of creating new jobs and increasing capital investment in Missouri.

The strong rebound of Missouri's economy that began during 2010 has been highlighted by the state adding new jobs for the first time in three years. This positive momentum, fueled by more businesses choosing to invest in Missouri, has placed added importance of having a trained and highly skilled workforce. We are fortunate to have the exceptional efforts of the Division of Workforce Development and our educational partners leading efforts in this area, supporting our outstanding Missouri businesses by enhancing their workers' skills through bold, innovative training programs.

Under Governor Nixon's leadership, we work tirelessly to fight for every job, every day, in every region of our state. To continue to move our state economy forward, the work of our training and workforce professionals will be crucial. I proudly present their successes in assisting Missourians with building skills and keeping our businesses strong over the past year.

Sincerely,

A handwritten signature in black ink that reads "David R Kerr".

David Kerr
Director
Missouri Department of Economic Development

Missouri Job Development Fund

The Missouri Job Development Fund is the **Department of Economic Development's (DED)** funding source for the **Missouri Customized Training Program**.

The **Missouri Job Development Fund (MJDF)** continues to be an important tool in our state's economic development efforts to create and retain jobs for Missourians. As such, it assists with the specialized training needed for companies to be successful and competitive.

Fiscal Year 2011 assistance statistics: **321 companies** and **10 training consortiums** were approved for funding assistance to train **32,000 workers** at an **average wage of \$20.31**. Additionally, Missouri companies receiving customized training assistance in Fiscal Year 2011 reported more than **\$1.2 billion in capital investment** at their facilities.

Since the program's inception in 1987, the Missouri Job Development Fund has assisted **4,693 Missouri companies** to train **535,475 Missouri workers**.

"We know that access to a skilled workforce is often the determining factor when a business or industry is deciding where to build, relocate, or expand.

The Customized Training Program has and will continue to provide the skilled workforce businesses depend upon to stay competitive."

—Governor Jeremiah W. (Jay) Nixon

Missouri Customized Training Program

The Missouri Customized Training Program provides assistance to businesses to train workers. It is administered by the **Division of Workforce Development (DWD)**.

Availability of a skilled workforce is a primary factor in a company's decision to add or create jobs, making this program a critical component in Missouri's economic development efforts.

Worker training is critical for Missouri's companies to meet the challenges of:

- a global economy;
- rapidly changing technology, and;
- demand for high-quality products and services.

The program's focus is job creation and retention. Factors such as capital investment and high wages, which support family-sustaining jobs, are keys to qualifying for assistance.

At the state level, DWD reviews and approves applications, disseminates funding, and provides program oversight.

At the local level, The Missouri Customized Training Program connects companies with **Local Educational Agencies (LEAs)**, such as community colleges and area career schools. LEAs are important partners with proven track records in aligning economic development and workforce development.

Fiscal Year 2011 Customer Survey

DWD is committed to customer satisfaction and strives to be responsive to customer input. Participating companies are surveyed on an annual basis to learn what is working, as well as what areas may need improvement.

Information is collected regarding:

- overall program;
- the Local Educational Agencies (LEAs), that administer the program locally, and;
- current company training needs and priorities.

**99% Overall Rating
of LEA Training
Coordinator
as Good or Excellent**

**98% Overall Program
Satisfaction
of Good or Excellent**

Top Five Types of Training Requested by Companies

Based on FY'11 Customer Survey Responses

1. Quality improvement
2. Productivity improvement
3. Implementation of new technology
4. Introduction of new product or process
5. Reduction of scrap

Building Relationships

Missouri has a number of Local Educational Agencies (LEAs) certified to administer the Missouri Customized Training Program.

LEAs are the local administrators for this program and provide personal assistance to companies in completing and submitting applications for training assistance. They provide ongoing management of training projects and serve as a liaison with DWD.

Many of these institutions are also equipped to provide a variety of specialized training to meet the demands of today's constantly changing business environment.

Local administration of training projects allows companies to build relationships with education professionals who have a sincere interest in that region's workforce, as well as access to a variety of training resources.

(See Page 13 for LEA contact information)

“Benefits received through this training program really allowed us to expand our ability to train our employees and expand our operation in Missouri.

The local educational agency, in my opinion, did an excellent job working with our industry and aiding in all aspects of the process.”

—Steve Nagel, Safety & Training Manager
Duke Manufacturing Company, Sedalia

Eligibility

The Missouri Customized Training Program is state funded and helps eligible companies create or retain jobs for Missouri workers. It can help lower the cost of locating a new facility or maintaining a facility in Missouri by assisting with funding for training services.

Companies located in Missouri that employ Missouri residents as full-time company employees and whose primary business is providing goods and services to markets outside the region may qualify if they are:

Creating New Jobs: A company may be eligible if it is increasing its employment level above the peak workforce number of the past year; or,

Making Capital Investment: A company may be eligible to retrain existing workers if the training is a result of a recent substantial capital investment.

The program is discretionary, with eligibility and approvals based on a combination of factors.

Factors affecting eligibility include: capital investment, high wages, job creation, targeted industries, interstate commerce, expansion of product lines or new processes, community impact, and the type of training requested.

Funds may be approved for individual projects or a consortium of companies.

“This is an excellent program which has helped – and is still helping - with our productivity and overall organization.”

—Bob Rubin, Controller
U.S. Tape and Label Corporation, Saint Louis

Training

Each company has training needs and skill gaps unique to its industry. Training provided through the Missouri Customized Training Program is as diverse as the companies served.

The program can assist with the right combination of training, from technical and quality to “soft” areas, such as leadership and team building.

The program assists eligible companies with training to meet their specific needs:

- to increase productivity and quality
- to introduce new technologies
- to develop new products.

Assistance is available for a variety of training costs, including instructional salaries, curriculum development, and training materials.

The “classroom” may consist of traditional tables and chairs, a production setting, or any other training location conducive to accomplishing the training.

Companies can choose from a variety of providers to best meet their training needs, including Missouri’s LEAs, many of which have specialized resources for business clients.

“The assistance is more than appreciated, as it helps in pushing the training needed to maintain a competitive edge. The company has plants throughout the country and our goal is to remain competitive and grow. This program allows and increases the ability to do just that.”

—Herb Dankert, General Manager
Jarden Plastics, Springfield

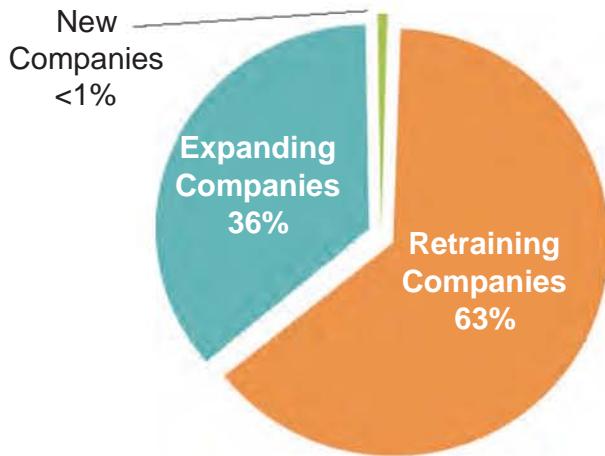

Fiscal Year 2011	
Missouri Job Development Fund Appropriation	\$9.5 Million
Number of training projects reviewed	424
Number of companies funded through MJDF	321
Number of consortia funded through MJDF	10
Average amount funded through MJDF, by project	\$27,190
Number of participating trainees	31,994
